Overview

Software engineering undergraduate, pursuing a dual degree in APU and DMU with hands-on experience in web-development, game-development and mobile development. Experienced in designing and using REST APIs and integrating with third party software through personal projects and work experience.

Education

- **BSc (Hons) Software engineering** 2023 - Present
 - Merit Scholarship recipient
 - Dual Bachelor degree (APU and DMU)
 - CGPA 3.44

Projects

- **Calendar automation app**
I am currently working on creating a Flutter application that gets an APU student's calendar data via a REST API that I built with Flask and then adds it to Google Calendar. Check the Python script on my Github: [Check it out](#)
- **Library Web App**
As a high school project, I made a library management system using Flask and sqlite on the backend, and Jinja 2 + CSS + javascript on the frontend: [Check it out](#)
- **Tetrish**
As a highschool project I made a tetris remix where the player has to arrange falling blocks into a meaningful english sentence. [Check it out](#)
- **Arranger**
A python script that arranges the files in the downloads directory based on filetype. [Check it out](#)

Experience

- **Software engineering intern -- stashaway (07/2025 - 11/2025)**
As a software engineering intern in stashaway, I was responsible for implementing software products for the stashaway mobile and web apps. I worked with typescript, mongodb, postgresql, react native, next js, express js, and go.
- **UMHackathon 2025**
Participated with "Sadaqapp" idea, an application that helps people in understanding islamic finances, improves financial literacy, and helps users in paying sadaqa (charity) and zakah.
- **APSara -- APU (10/2024 -- 10/2025)**
Built a smart assistant for APU students that utilizes the university's knowledge base to help the students

Skills

- **Programming Language:** TypeScript, Javascript, Python, C++, C, C#, Java, SQL, Kotlin, Dart, GO, R
- **Frameworks:** NextJS, React, React Native, Express, Nest, Flutter, Flask, Django, FastAPI, Swing, .NET, Kotlin Compose, PyTest, Jest, postgres sql, sqlite, mongoDB
- **Tools & platforms:** Git, Github, GitLab, Jira, Docker, Linux, CI/CD, Postman, Debugging tools, IDE
